INDUSTRIAL ART OF THE ENGLISH PEOPLE

Beautiful forms and designs are not made by chance nor can they ever be made in any material at small expense for all works of quality must bear a price in proportion to the labour, skill and experience attending their invention and manufacture.

Those things called dear are, when justly estimated, the cheapest; they are attended with much less profit to the artist and inventor than those which people call cheap.

Things which are made for cheapness and not for excellence of workmanship are the most frequent and certain cause for the rapid decay of the arts and fine manufactures.

GENERAL INFORMATION

This catalogue illustrates a few examples of our work and is intended as a guide to customers in their choice of Ornamental Ironwork.

All the examples shown are hand forged. No jigs or machines are used in their construction.

We shall be pleased to quote against Architects' drawings but we can also offer for approval designs prepared by our own staff.

Normal finishes are black, pewter or white but other requirements can be accommodated, such as, for example, picking out in gold leaf. Rustproofing before painting is recommended for outside use and this is normally quoted for as an optional extra.

It is essential that accurate site dimensions are provided by an Architect or a competent Builder or alternatively, we can take our own dimensions on site for a fee based on the time taken and distance involved.
